Five plates and two text figures.

LEE, H. ATHERTON, and YATES, HARRY S. Pink disease of citrus 657
Seven plates and two text figures.

ERRATA 675

INDEX 677

ANNOUNCEMENT

With the beginning of 1919 the sections of the Philippine Journal of Science will be combined, and the publication will be issued as a monthly; each number will be larger than the present bimonthly issues. The policy with regard to the character and scope of the material published will be continued. The Journal is intended to be as it has been, the scientific organ of the Philippine Government, and will be devoted to the scientific and commercial interests of the tropics. Its aim will be to collect and publish in one place original scientific information and material relating to the Philippine Islands. Suitable articles will receive prompt publication in the Philippine Journal of Science, and specialists working on Philippine material will continue to receive hearty coöperation.

The subscription price will be 5 dollars United States currency per annum. A refund of 2 dollars will be made to anyone that has forwarded a subscription for the four sections of the Journal at the old rate of 7 dollars. Any sum received as a subscription to a single section will be credited, and a bill will be rendered for the balance due at the new rate.

The Philippine Journal of Science in its new form will be sent in exchange to all periodicals and institutions with which exchange relations are in force.

THE EDITORS.

MANILA, P. I., *December 31, 1918.*
